

# Registered Nurses

Our Registered Nurses are responsible for ensuring that quality care is delivered to each of our residents, assessing and documenting the care given and managing their nursing team.

We employ Registered Nurses (RN) with varying different levels of experience and expertise. Our on-site educators provide Registered Nurses with education and support, particularly in documentation and medication management. Additional support is provided to RNs who are returning to the workforce. All new staff are allocated to work alongside a mentor to enable them to become familiar with the Nursing Home Policies and Procedures whilst getting to know the residents and staff.

Thompson Health Care provides ample onsite education to assist our RNs in meeting the requirements of the Nurses and Midwives Registration Board. In addition, education opportunities are made available to Registered Nurses wanting to enhance their clinical and / or leadership skills. Promotion is always considered when management positions become available.
