

Education Training

Government Funded Resident Computers

Following information gained from a RAO seminar, Tarragal House applied for and was granted approval for 2 computers, desks and chairs funded by the Government. The computers will be for resident use only.

The application was a lengthy process but the cost to us was only the installation of the telephone lines for dedicated use by the computers.

All interested residents will be encouraged and assisted to learn this new skill. Volunteers from the community will be encouraged to assist by tutoring these residents.
