## Profile

As a very presentable person and who prides herself on others. My skills include effective communication, active listening and showing compassion and empathy to all I serve. Love when I can make a difference in lives of disadvantage individuals and anybody who requires assistance and love. As a person who loves a fashion I have positioned myself to work with a retail organization that requires a person who wants to serve the stores and clients and continue to busy in the low times. If I continue to busy in the low times. If I continue to learn from others I'm happy and continuously broadening my skills and knowledge.

I have working experience 15 years as Assistant in Nurse, Carer, Care Service Employee and Life Style Coordinator ( RAO )
